**Detailed Description/Instructions:** Students will watch one quality and one poor debate. In pairs students will analyze and evaluate both debates using a Plus/Delta chart, or other appropriate quality tool. The pair will provide specific details to support their Plus/Delta decisions. Engaging Experience 1
Title: What is Public Forum?
Suggested Length of Time: 1 Day

Standards Addressed

Priority:
- 8.SL.2.C Plan and deliver appropriate presentations based on the task, audience and purpose, integrating multimedia into presentations to clarify information, strengthen claims and evidence, and add interest.
- 8.SL.2.A Speak audibly, and to the point, using conventions of language as appropriate to task, purpose, and audience when presenting, including appropriate volume, clear articulation, and accurate pronunciation at an understandable pace.

Supporting:
- 8.SL.1.B Delineate a speaker’s argument and claims, evaluating reasoning and sufficiency of evidence in order to pose questions that connect the ideas of several speakers and respond to others’ questions and comments with relevant evidence, observations, and ideas.

Detailed Description/Instructions: Explain the concept of a public forum debate-- this type of debate is a two-man team debate. Each team will prepare both sides of an argument (for and against) on one nationally determined topic (via www.speechanddebate.org). Students should understand that they will never know what side they will be arguing until the debate begins (it is a coin flip). All the specific rules and time limits are available on the National Speech and Debate website (speechanddebate.org). The teacher may choose to modify the time constraints to adjust for student level and class period limitations.

**Engaging Scenario**

(An Engaging Scenario is a culminating activity that includes the following components: situation, challenge, specific roles, audience, product or performance.)

**Participate in Public Forum Debate**

After students prepare, model and practice in partners, they will participate in a class debate, using the format and rules found on [www.speechanddebate.org](http://www.speechanddebate.org). As a culminating class assessment, the teacher should emphasize the importance of incorporating all public speaking skills learned throughout the semester. During the debate, students in the audience will evaluate the debater’s performances using a peer evaluation form. Students will reflect on their own performances based on self, teacher and peer feedback. The teacher may choose to organize a debate with another middle school class or arrange to have high school students judge the debate.

Unit of Study Terminology

**Appendices:** All Appendices and supporting material can be found in this course’s shell course in the District’s Learning Management System.

**Assessment Leveling Guide:** A tool to use when writing assessments in order to maintain the appropriate level of rigor that matches the standard.

**Big Ideas/Enduring Understandings:** Foundational understandings teachers want students to be able to discover and state in their own words by the end of the unit of study. These are answers to the essential questions.

**Engaging Experience:** Each topic is broken into a list of engaging experiences for students. These experiences are aligned to priority and supporting standards, thus stating what students should be able to do. An example of an engaging experience is provided in the description, but a teacher has the autonomy to substitute one of their own that aligns to the level of rigor stated in the standards.

**Engaging Scenario:** This is a culminating activity in which students are given a role, situation, challenge, audience, and a product or performance is specified. Each unit contains an example of an engaging scenario, but a teacher has the ability to substitute with the same intent in mind.

**Essential Questions:** Engaging, open-ended questions that teachers can use to engage students in the learning.

**Priority Standards:** What every student should know and be able to do. These were chosen because of their necessity for success in the next course, the state assessment, and life.

**Supporting Standards:** Additional standards that support the learning within the unit.

**Topic:** These are the main teaching points for the unit. Units can have anywhere from one topic to many, depending on the depth of the unit.

**Unit of Study:** Series of learning experiences/related assessments based on designated priority standards and related supporting standards.

**Unit Vocabulary:** Words students will encounter within the unit that are essential to understanding. Academic Cross-Curricular words (also called Tier 2 words) are those that can be found in multiple content areas, not just this one. Content/Domain Specific vocabulary words are those found specifically within the content.
