Essential Questions:
1. What is the structure of the US Constitution?
2. What are the six underlying principles of the Constitution and why are they necessary?
3. How is the Constitution a living document?
4. How did the U.S. Constitution address the weaknesses of the Articles of Confederation?
5. What role did compromise play in writing the U.S. Constitution?

Enduring Understanding/Big Ideas:
1. The U.S. Constitution has a preamble, 7 Articles, and 27 Amendments.
2. The six underlying principles of the Constitution are popular sovereignty, limited government, separation of powers, checks and balances, judicial review, and federalism. They are all important as they contribute to a democracy and the idea of shared power between the government and the people.
3. The U.S. Constitution can be amended and changed. Its wording allows for interpretation by the Supreme Court.
4. The U.S. Constitution created an executive branch, included the "elastic clause", added the ability to amend, and included the 6 main principles which improved it from the Article of Confederation.
5. Without compromise, the U.S Constitution would not have been able to be created. The Great Compromise, and the 3/5th Compromise allowed the Constitution to be ratified by 3/4ths of the states.

**Webb’s DOK:** 2
Engaging Scenario

In this simulation, students will be assigned a role as a delegate to the Constitutional Convention. Their initial task is to research how their delegate chose to vote and interact during the convention in 1787. Then, they will create an online profile of their delegate on www.ning.com in the private cyber convention network. The scenario moves toward a re-enactment of the Constitutional Convention by having students blog, converse, vote and ratify various parts of the document to create their own Constitution.

**RESOURCE MODIFICATION:** Complete the initial task only.

**Essential Questions:**
1. How did U.S. expansion change the American Identity?
2. Why did America feel the need to expand?
3. What role did conflict play in Westward Expansion?
4. What role did technology play in Westward Expansion?
Enduring Understanding/Big Ideas:

1. America at its founding has the intention of spreading from “sea to shining sea” (manifest destiny). Americans in the early 1800s were given the ability to achieve this goal. Americans began to form an identity of independence, bravery, hard work, entrepreneurship and a renewed sense of adventure. Because the country expanded so quickly and drastically, a new sectionalism developed and microcosms of cultures sprung up.

2. Americans felt the need to expand to keep up with population growth. They also wanted to compete with European nations on a world stage. Americans knew land meant power.

3. Conflict with native groups, conflict with immigrant groups, and conflict with neighboring nations forced the United States to make distinct foreign policy.

4. Technology allowed for a faster and easier trip to the west. It allowed for quick communication and ease of living (i.e. barbed wire, mechanized farm machinery, railroads, telegraphs, steam engines, etc.) Though the nation’s borders expanded tremendously, the nation stayed united with these new forms of technology.

Essential Questions:

1. Why can it be argued that the Civil War was inevitable?
2. How did sectionalism contribute to the start of the Civil War?
3. How did the strategies and motivations of both sides cause political, economic, and social consequences after the Civil War?

Big Ideas/Enduring Understandings

1. It can be argued that the Civil War was inevitable because of the many years of division that tore the North and South apart leading up the war. These years of division include debates over state's rights, slavery, and westward expansion. Furthermore, many events, like the Brooks-Sumner Affair, the Dred Scott Decision, the KS-NE Act, and the MO Compromise, occurred that only deepened the division. Any attempts at compromise failed to heal the broken nation.

2. Sectionalism occurred in America prior to the Civil War because the North and South were more concerned about their own political, economic, and social motivations than concerned about the country as a whole. The North believed in a strong, national government and limiting the spread of slavery. The South's political beliefs centered on state's rights and protection of property ownership. While the North had industrialized, the South remained heavily dependent upon an agricultural society. Slavery was also a major contributing factor to the growing sectionalism in the United States.

3. The North was motivated to end the war as quickly as possible thus they waged total warfare on the South. The Confederate's strategy was to wear the North down by making them chase the Confederate army, therefore the majority of the fighting occurred in the South. Both of these strategies caused economic and social consequences after the Civil War. The motivation to free the slaves with the Emancipation Proclamation had lasting political ramifications, also.

**Essential Questions:**

1. What political, economic, and social factors did the American government have to consider when determining the best course for Reconstruction? Why did they settle on the plan they selected?
2. Why can it be argued that Reconstruction failed?
3. How did the political, economic, and cultural consequences of Reconstruction shape the rebuilding nation?

**Corresponding Big Ideas/Enduring Understandings:**

1. The American government had to consider which solution would be the quickest, most supportive to freed slaves, result in the least amount of hard feelings, and most financially efficient when determining how to bring the South back into the Union after the Civil War. The plan they chose was based upon a non-punitive reaction to the South and was intended to rapidly make them a part of the nation again. The plan was also designed to support newly freed African Americans.

2. The argument for failed Reconstruction can be made in many ways. First, the economic disparities between the North and South still remained. Second, African Americans were not provided with racial or social equality. Third, anti-Union and anti-Northern feelings remained strong in the South.

3. Reconstruction did go according to plan. Politically many ex-Confederates resumed roles of power and barred African Americans from entering office and practicing suffrage. Economically, the war torn South was slow to adopt industry and found themselves forced into poverty. Culturally, segregation and racism fueled hatred throughout the country and society had to grasp with the loss of a generation of young men. These problems shaped the nation’s struggles for more than a hundred years to come.

Unit of Study Terminology

**Assessment Leveling Guide:** A tool to use when writing assessments in order to maintain the appropriate level of rigor that matches the standard.

**Big Ideas/Enduring Understandings:** Foundational understandings teachers want students to be able to discover and state in their own words by the end of the unit of study. These are answers to the essential questions.

**Engaging Experience:** Each topic is broken into a list of engaging experiences for students. These experiences are aligned to priority and supporting standards, thus stating what students should be able to do. An example of an engaging experience is provided in the description, but a teacher has the autonomy to substitute one of their own that aligns to the level of rigor stated in the standards.

**Engaging Scenario:** This is a culminating activity in which students are given a role, situation, challenge, audience, and a product or performance is specified. Each unit contains an example of an engaging scenario, but a teacher has the ability to substitute with the same intent in mind.

**Essential Questions:** Engaging, open-ended questions that teachers can use to engage students in the learning.

**Priority Standards:** What every student should know and be able to do. These were chosen because of their necessity for success in the next course, the state assessment, and life.

**Supporting Standards:** Additional standards that support the learning within the unit.

**Topic:** These are the main teaching points for the unit. Units can have anywhere from one topic to many, depending on the depth of the unit.

**Unit of Study:** Series of learning experiences/related assessments based on designated priority standards and related supporting standards.

**Unit Vocabulary:** Words students will encounter within the unit that are essential to understanding. Academic Cross-Curricular words (also called Tier 2 words) are those that can be found in multiple content areas, not just this one. Content/Domain Specific vocabulary words are those found specifically within the content.
