END OF ADDENDUM NO. 1

PARK HILL SUPPORT SERVICES CENTER & TRANSPORTATION HUB FFE BID QUESTION RECORD

DATE: 06.17.2019

QUESTION:

RESPONSE:

<p>Q1: E7 – Discrepancy between Proposal Form Schedule and Item Spec Sheet Qty.</p>	<p>Qty for E7 should be one (1)</p>
<p>Q2: Also quick question on the Allsteel. The specs say black grommets, but usually how Allsteel works is that whatever laminate is selected there will be a coordinating grommet, which is standard. If they do want the black grommets it would be a special, but I wanted to check before I submitted for that.</p>	<p>All grommets to be black</p>
<p>Q3: Item T10 is specified wrong. There are four power grommets called out. That table with the G2 cutouts will have space for only 2 power grommets. The Extron Plate model numbers are not Hon's. I assume they are from Byrne? Do you know if they will fit the Hon power grommets?</p>	<p>Custom tabletop with 4 power grommets as specified. Extron plates model #s are to be procured from Extron directly</p>
<p>Q4: E11 for quantity (2) of a Rotary SM30. With these lifts there is the option for (2) Rolling Jacks in the middle of the lifts that allow you to lift the vehicles wheels off the runways. Is this something you think we should add to the quote as well, or even possibly send in two bids for section E11</p>	<p>Two separate bids is acceptable; one quoting the item as specified and one including the rolling jack as a voluntary alternate</p>
<p>Q5: T18 is specified to be 96"x40" but this would be a custom. The largest size offered is 96"x36"</p>	<p>96"x36" size is acceptable</p>
<p>Q6: S20 has a discrepancy between the model number and specified depth</p>	<p>Provide item indicated by model #; depth to be 24"</p>
<p>Q7: You have several items that the model number is listed as a "special" (starts with SPLH) Can you clarify what modifications you are making to each of these items?</p>	<p>D5: Bullet Peninsula 30x72 – this is a standard size – what is the modification? Grommet in the Worksurface top</p> <p>Tower – special BBF configuration – can you explain the special configuration? The standard is a File File configuration. We'd like a BBF configuration</p> <p>D6: Bullet Peninsula 30x72– this is a standard size – what is the modification? Same as above</p> <p>Tower – special BBF configuration – can you explain the special configuration? Same as above</p> <p>D13: 48x24 Credenza shell with 10"H modesty – this is a standard size – what is the modification? Grommet in worksurface top</p>

	D14: 48x24 Credenza shell with 10”H modesty – this is a standard size – what is the modification? Grommet in worksurface top
Q8: D5 – D6 the hon desk peds ,should these have pulls	Reference 2 nd page of spec; yes, D: Canopy, Black
Q9: S1 is a hon lateral file – can you confirm that this should have a posting shelf up top	Yes, top shelf is posting shelf not a drawer on full extension
Q10: S5 sticks out past doors in plan	Will adjust in the field during installation
Q11: D5 & D6- Wall Mounted Overhead Storage Model# is for Non-Locking Overheads. Keying instruction requested a lock be ordered for the overhead (HF27B.X) to be keyed alike to the other storage.	Locking overheads not required for items D5 or D6
Q12: D8- Stack on Storage Model number is for Non-Locking Hutch. Key instructions requests the storage to be keyed alike. Currently the pedestal is the only locking storage in the typical.	Locking overheads are not required for item D8
